Mr. Ken Cooper
C & R Minerals
P. O. Box #4
Mack, Colorado 81525

Dear Mr. Cooper:

Re: Notice of Intent to Commence Mining Operations, C & R Minerals, S/019/024,
Grand County, Utah

this letter is to follow-up on our conversation on Tuesday, June 12, 1990, of last week. The Division of Oil, Gas and Mining will require that C & R Minerals file a Small Mine Operator Notice of Intent, in respect to the operation you have initiated in Grand County, Utah.

The State, as of December 1988, requires that all mine operations file with the Division. Utah used to have a 2 acre and under exemption, but this was eliminated via statutory change.

I have enclosed, for your information, a packet containing our new rules and forms. Please read over the section on small mine operations and fill out the Small Mine Operator's form.

According to my information, your site is located in the NW1/4 of Section 29, T22S, R24E. If this is wrong, please correct it on the form you are returning.

Please explain on the form, the basic mine procedures you are using. We will also need to know what types of chemicals you are using in your process. Briefly, explain their use and how they are to be disposed of.

I indicated earlier, that the Utah Bureau of Water Pollution Control (BWPC) would have to be notified concerning your operation. Their interest will involve the potential

groundwater impacts from the tailings ponds you are installing and the proper disposal of chemicals you will be using on site. I have notified them in regard to the ponds. They will no doubt, send you their own permitting information. Please return the information requested as soon as possible, to both ourselves and BWPC.

Sincerely,

A handwritten signature in black ink, appearing to read "Holland Shepherd". The signature is fluid and cursive, with the first name "Holland" and last name "Shepherd" clearly distinguishable.
